November is Hospice + Palliative Care Month

- **Hospice is a type of care that focuses on providing comfort and support to patients who are facing a terminal illness.**
- **Palliative care is a type of care that focuses on relieving the symptoms of a serious illness, regardless of whether the illness is curable.**

- **Talk to your loved ones about your wishes for end-of-life care. This can be a difficult conversation, but it is an important one to have.**

"For God so loved the world, that he gave his only Son, that whoever believes in him should not perish but have eternal life." **John 3:16:**

November is Hospice + Palliative Care Month

- **Hospice care gives you someone you can contact with questions or concerns. A member of the Hospice care team is just a phone call away.**
- **Hospice is not just care for the patient — it's support for the whole family.**
- **From managing illness to offering emotional and practical help, a hospice team helps the family too, so no one has to go through it alone.**
- **Cost should not stand in the way of good care. Hospice is covered by Medicare, Medicaid, and most private insurance plans, so families can focus on spending time together instead of worrying about the bill.**
