FROM THE PASTOR'S DESK

My Dear Friends,

This past weekend I was able to visit, along with some of your fellow parishioners, our newly completed pipe organ in Gloucester, Massachusetts. It was a beautiful pilgrimage that included a brief organ crawl through Boston with stops in the Harvard University chapel to hear their pipe organ (made by the same organ builder as ours) and Mass celebrated for all of you in Holy Cross Cathedral.

When we arrived in the workshop of CB Fisk in Gloucester last Saturday, our pilgrims did not know what to expect, and to be honest with all of you, neither did I. When this entire project started, I was a novice when it came to pipe organs. As I have often said, the only thing I knew about pipe organs is that they inspired me, but over the last three years, I have gotten a whirlwind education into the intricacies of mechanical action pipe organs. When I arrived last week, I thought I was going to see our completed organ, hear some exceptional organists play it, and share it with our traveling parishioners. What I received was even more of an education of what is about to be installed in the balcony of our church. Seeing the inner mechanics of our organ and how hard these skilled workers labored to make this a reality, and then getting an even deeper education from a world-renowned organist explaining how our organ actually works, left us captivated and awed.

If I may, I would like to share with you some words written by one of the pilgrims, Steven Befera, who serves as the head of our Parish Council and who is also a member of our Schola, about his experience last weekend and to offer a parishioner's point of view:

As we all know, our church has been recently renovated. Through this work, there has been a carefully planned acoustical transformation of the space in anticipation of the arrival of a new pipe organ which we hope to begin installing next month. The construction of the organ (named Opus 166) was recently completed in Massachusetts. I had the honor of accompanying Father Manny, our Pastor, Luis J. Cuza, our Director of Music Ministries, and several other parishioners to an open house sponsored by the organ manufacturer. Please accept the following as a summary of what I saw and learned.

The new pipe organ for the Church of the Little Flower is a work of art. It is a 3 keyboard, mechanical, true symphonic pipe organ of 46 voices (pipe "ranks") and 55 stops (control knobs) with 3,035 pipes, the smallest of which is the size of a pencil and the largest of which is the size of a utility pole.

It is both massive and intricate, composed of thousands of individually hand-hewn metal and wood pieces and specifically manufactured integrally related and meticulously aligned moving parts. The organ has been custom designed and built for our sanctuary by CB Fisk, Inc. of Gloucester, Massachusetts (see cbfisk.com). It has taken approximately 35,000 manual labor hours to complete, with transport, onsite installation, and tuning by CB Fisk in our church still pending. CB Fisk is a world-renowned organ builder, having been developed by Charles B. Fisk, a Harvard-trained Physicist who previous to his work designing and building organs, served in the Manhattan Project in a siloed development program that ultimately (unknown to him) helped create the detonator mechanism for the "Fat Man" atomic bomb dropped on Nagasaki, Japan, ending World War II.

The organ is now being disassembled and will be packed into 2 fifty-three-foot semi-trailers for transport to Coral Gables. Additionally, some of the larger pipes will arrive directly from The Netherlands. Fisk will send its team of artisans to work on the installation which is anticipated to take approximately 6 weeks.

This magnificent pipe organ is truly something to behold. At the open house in Gloucester, more than 800 people from the area, some parking a half mile down the road, came to see and hear the first "public notes" played on the massive device. The complexity of the instrument is mind-boggling and how all the parts work seamlessly in harmony creating heavenly sounds is magical. We are truly blessed. Thanks to Father Manny, Luis Cuza, and all those who have contributed their time and treasure to make this happen! Praise the Lord!
—Steven P. Befera

One hundred years ago, our founders set out to boldly build this beautiful church which we now worship in every day. It was always our intention when we began our centennial campaign to be equally as bold in building on that legacy by bringing the crown jewel of our centennial campaign home with Opus 166. We cannot wait for you to see and hear this incredible and heavenly gift that will enhance our worship for generations to come.

God bless you all,

DEL ESCRITORIO DEL PÁRROCO

Mis Queridos Amigos,

El pasado fin de semana pude visitar, junto con algunos de vuestros compañeros feligreses, nuestro recién terminado órgano de tubos en Gloucester, Massachusetts. Fue una hermosa peregrinación que incluyó un breve recorrido por órganos por Boston con paradas en la capilla de la Universidad de Harvard para escuchar su órgano de tubos (hecho por el mismo organista que el nuestro) y una misa celebrada para todos vosotros en la Catedral de Holy Cross.

Cuando llegamos al taller de CB Fisk en Gloucester el pasado sábado, nuestros peregrinos no sabían qué esperar y, para ser sincero con todos vosotros, yo tampoco. Cuando empezó todo este proyecto, yo era un novato en lo que respecta a los órganos de tubos. Como he dicho a menudo, lo único que sabía sobre los órganos de tubos es que me inspiraron, pero en los últimos tres años he recibido una educación vertiginosa sobre las complejidades de los órganos de tubos de acción mecánica. Cuando llegué la semana pasada, pensé que iba a ver nuestro órgano terminado, escuchar a algunos organistas excepcionales tocándolo y compartirlo con nuestros feligreses itinerantes. Lo que recibí fue aún más una explicación sobre lo que está a punto de instalarse en el balcón de nuestra iglesia. Ver la mecánica interna de nuestro órgano y lo duro que estos trabajadores cualificados se esforzaron para hacerlo realidad, y luego recibir una educación aún más profunda de un organista de renombre mundial que nos explicó cómo funciona realmente nuestro órgano, nos dejó cautivados y asombrados.

Si me permite, me gustaría compartir con vosotros unas palabras escritas por uno de los peregrinos, Steven Befera, que es el jefe de nuestro Consejo Parroquial y también miembro de nuestra Schola, sobre su experiencia el pasado fin de semana y ofrecer el punto de vista de un feligrés:

Como todos sabemos, nuestra iglesia ha sido renovada recientemente. A través de este trabajo, se ha planificado cuidadosamente una transformación acústica del espacio en previsión de la llegada de un nuevo órgano de tubos que esperamos comenzar a instalar el mes que viene. La construcción del órgano (llamado Opus 166) se completó recientemente en Massachusetts. Tuve el honor de acompañar al padre Manny, nuestro párroco, Luis J. Cuza, nuestro Director de Ministerios Musicales, y a varios otros feligreses a una jornada de puertas abiertas patrocinada por el fabricante del órgano. Por favor, aceptad lo siguiente como un resumen de lo que vi y aprendí.

El nuevo órgano de tubos para la Iglesia de la Pequeña Flor es una obra de arte. Es un órgano de tubos sinfónico auténtico de 3 teclados, mecánico, de 46 voces ("rangos") y 55 registros (mandos de control) con 3.035 tubos, el más pequeño del tamaño de un lápiz y el más grande del tamaño de un poste de luz.

Es a la vez macizo e intrincado, compuesto por miles de piezas de metal y madera talladas a mano individualmente y fabricadas específicamente piezas móviles integradas y meticulosamente alineadas. El órgano ha sido diseñado y construido a medida para nuestro santuario por CB Fisk, Inc. de Gloucester, Massachusetts (véase cbfisk.com). Ha requerido aproximadamente 35.000 horas de trabajo manual completarlo, con el transporte, la instalación in situ y la puesta a punto por parte de CB Fisk en nuestra iglesia aún pendientes. CB Fisk es un constructor de órganos de renombre mundial, desarrollado por Charles B. Fisk, un físico formado en Harvard que, antes de su trabajo diseñando y construyendo órganos, participó en el Proyecto Manhattan en un programa de desarrollo aislado que, sin que él lo supiera, ayudó a crear el mecanismo detonador de la bomba atómica "Fat Man" lanzada sobre Nagasaki, Japón. Fin de la Segunda Guerra Mundial.

El órgano está siendo desmontado y se empaquetará en 2 semirremolques de cincuenta y tres pies para su transporte a Coral Gables. Además, algunas de las tuberías más grandes llegarán directamente desde los Países Bajos. Fisk enviará a su equipo de artesanos para trabajar en la instalación, que se prevé que dure aproximadamente 6 semanas.

Este magnífico órgano de tubos es realmente digno de admirar. En la jornada de puertas abiertas en Gloucester, más de 800 personas de la zona, algunas aparcando a media milla más adelante, acudieron a ver y escuchar las primeras "notas públicas" tocadas en el enorme dispositivo. La complejidad del instrumento es asombrosa y cómo todas las partes funcionan perfectamente en armonía creando sonidos celestiales es mágico. Somos realmente afortunados. ¡Gracias al padre Manny, Luis Cuza y a todos los que han contribuido con su tiempo y recursos para que esto sea posible! ¡Alabado sea el Señor! —Steven P. Befera

Hace cien años, nuestros fundadores se propusieron construir con valentía esta hermosa iglesia en la que ahora adoramos cada día. Siempre fue nuestra intención, al comenzar nuestra campaña del centenario, ser igual de audaces para construir sobre ese legado, trayendo a casa la joya de la corona de nuestra campaña con el Opus 166. Estamos deseando que veas y escuches este increíble y celestial regalo que enriquecerá nuestra adoración por generaciones venideras.

Que Dios los bendiga a todos,

Fr Manny
